Goldman Sachs City Fellowship 2009/10

TECHNOLOGY

Firm Overview:

The Goldman Sachs Group, Inc. is a bank holding company and a leading global investment banking, securities and investment management firm. We provide a wide range of services worldwide to a substantial and diversified client base that includes corporations, financial investors, governments, non-profit organisations and high net worth individuals. In doing so, we bring together people, capital and ideas to make things happen for our clients.

Business Unit Overview:

Goldman Sachs long-term commitment to technology is unparalleled in the financial services industry. Our technologists, working in close partnership with both internal and external clients, exemplify the collaborative, team-driven environment that is the hallmark of the Goldman Sachs culture. Technology projects are global and global scale and allow our people to work with colleagues in over 20 different countries. We help launch new business lines, enable business growth and design the infrastructure that is the engine of the firm's capabilities around the world.

Responsibilities:

Using their technical and analytical skills coupled with a strong interest in the business, the successful candidate will employ OO technology to build quality solutions for the clients.

- Become an integral part of the Technology team and help evolve the components and platforms
- Full lifecycle development from requirements analysis, design, development and testing, developing new applications, tools and workflows to improve operation efficiency
- Support the existing systems whilst helping to migrate into strategic solutions
- Be comfortable working with several different technology platforms deployed within the Technology area including OO proprietary scripting language, Java, Sybase, XML
- Develop a good understanding of the business and the products traded
- Work closely with the global Technology team in New York and Hong Kong.

Skills and Experience:

- Experience of OO analysis, design and programming
- Java coding experience and exposure to middleware such as TIBCO
- Good working knowledge of Databases such as UNIX, SQL
- Strong team-player and excellent communication skills
- Good analytical and troubleshooting skills
- Ability to work under pressure in time critical situations using sound judgement and professionalism
- Require good client-facing skills as there will be regular interaction with the front office, strategists, as well as middle office, financial controllers and other technology teams
